

Car Charger Tracker

GPS Tracker Getting Started Guide

IMPORTANT: You must activate your tracker to get started! Go to logistimatics.com/activate

1 Turning Your Tracker On

Your tracker is shipped turned on, so you just need to plug it into your car's charging outlet. Note that the car's ignition may need to be on for some outlets to work.

2 Tracker Lights

The tracker lights will flash a few times when the tracker is initially plugged in. After a few seconds the tracker will not blink any more.

3 Download the tracking app

Download the mobile app from the App Store or Play Store by searching for "logistimatics". You can also track from any web browser at gps.logistimatics.com

4 Login with email and password

Login to the app with your email address and the password you used when you purchased the tracker.

Setting up live audio for your tracker

1 Make sure tracker is on

Before you can use live audio, make sure the tracker is in the car and the power port it's plugged into is on.

2 Add your cellphone as the SOS

In the mobile app, click Commands > then + to send a new command > then Set SOS Numbers

Enter your cellphone number. This sets your cellphone as the authorized SOS number.

3 Call your tracker's phone number

To start listening, simply call your tracker's phone number. You can get the phone number from the mobile app by clicking the INFO button. If you have added your cellphone number as the SOS number, you will immediately audio from the tracker when you call it.

4 The Tracker Picks Up

If you have set your SOS number successfully, the tracker will pick up after two rings and you will be able to hear what is happening.

Tracker Placement

Try to give the tracker the best possible view of the sky. For car tracking, place it anywhere inside the cab. Do not place in trunk of car. It can't get a GPS signal when surrounded by metal.

Setting up alerts

To be notified if your tracker enters or exits an area, create a geofence. In the mobile app, click Geofences > New Geofence. Give your new geofence a name, address and size.

Troubleshooting

If you have a question or problem, we can help. Learn more about your tracker's features, watch tutorial videos and ask questions at logistimatics.com/contact

Fully Functional USB Charger

The tracker works great as a USB charger and can charge two devices at a time.
