

1

CHARGING YOUR TRACKER

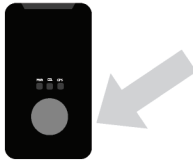

Charge your tracker by connecting the included charging cable and charger. The red LED will flash while charging and become solid when fully charged. Charging time is 2-3 hours.

2

TURN YOUR TRACKER ON

The power button is located on the bottom right side of the tracker. To turn your tracker on, press and hold the power button for 3 seconds. All LEDs will illuminate and the tracker will vibrate when powered on.

3

DOWNLOAD THE TRACKING APP

Download the mobile app from the App Store or Play Store by searching for 'logistimatics'. You can activate your tracker from the app or at logistimatics.com/activate

4

LOGIN WITH EMAIL & PASSWORD

Login to the app with your email address and the password you used when you purchased the tracker.

Tracker placement
Try to give the tracker the best possible view of the sky. For car tracking, place it anywhere inside the cab. Do not place in trunk of car. It can't get a GPS signal when surrounded by metal.

Setting up alerts
Create a geofence to be notified when your tracker enters or exits an area. In the mobile app, tap Geofences > New Geofence. Give your new geofence a name, address and size.

Troubleshooting
We can help if you have questions or problems. Learn more about your tracker's features, watch tutorial videos and ask questions at logistimatics.com/support

Waterproof magnetic case
You can purchase a waterproof magnetic case for mounting under a vehicle (not included). logistimatics.com/tracker-case

About your tracker

1 Tracker reporting frequency

By default, the tracker will report its location frequently. This is configurable in the app. To change the report frequency go to Commands > then 'New' to send a new command > Change report frequency.

2 The SOS button

The round button on the tracker is the SOS button.

When the SOS button is pressed, the tracker will vibrate and the tracker will report its current position on the map.

3 The Micro 430 is a 4G Tracker

Most trackers work on the 2G or 3G cellular network. The Micro 430 is a 4G tracker. This allows the tracker to provide the most reliable tracking experience possible. The tracker works on the AT&T cellular network.

4 Historic locations

The tracking app will show you where the tracker is right now and everywhere it has been. The app will automatically store all the positions over the last 90 days.
