

## 1 INSTALLING YOUR TRACKER

To begin using your tracker, simply plug it into the vehicle's cigarette lighter or AUX port, and the device will promptly power itself on. Note that in some vehicles, the ignition may need to be on for the outlet to work.

## 2 TRACKER LIGHTS

When the tracker is securely connected to the AUX port and is receiving power, a faint red LED should be present, indicating that the device has powered on. A faint blue LED may also be present above the red light.

## 3 ACTIVATE YOUR DEVICE

Visit [logistimatics.com/activate](https://logistimatics.com/activate) to activate your device.

## 4 DOWNLOAD THE TRACKING APP

Download the mobile app from the App Store or Play Store by searching for 'logistimatics'.

### Tracker Placement

Try to give the tracker the best possible view of the sky. For car tracking, place it anywhere inside the cab, plugged into the charging port. Do not place it in trunk of car, it can't get a GPS signal when surrounded by metal.

### Setting up alerts

To be notified if your tracker enters or exits an area, create a geofence. In the mobile app, click Geofences > New Geofence. Give your new geofence a name, address and size.

### Troubleshooting

If you have a question or problem, we can help. Learn more about your tracker's features, watch tutorial videos and ask questions at [logistimatics.com/contact](https://logistimatics.com/contact)

### Fully functional USB charger

The tracker includes fully functional USB-A and USB-C ports (one of each) which can be used to charge phones, tablets and more. Fast charging is supported.

## Setting up live audio for your tracker

### 1 Make sure tracker is on

Before you can use live audio, you will need to set your cellphone number as the number that's authorized to listen (this is called the SOS number) and is REQUIRED to be set before the live audio feature will work. First, make sure your tracker is powered on.

### 2 Add your cellphone as the SOS

In the mobile app, click Commands > then + or 'New' to send a new command > then set SOS Numbers. Enter your cellphone #. This sets your cellphone as the authorized SOS number.

### 3 Call your tracker's phone number

To start listening, simply call your tracker's phone number. You can get the phone number from the mobile app by clicking the INFO tab and pressing the 'call' button. If you have added your cellphone number as the SOS number, you will immediately hear audio from the tracker when you call it.

### 4 The tracker picks up

If you have set your SOS number successfully, the tracker will pick up after two rings and you will be able to hear what is happening.
